Profile

Junior Data Analyst who turns messy, real-world data into decisions leadership can act on. Strong business acumen paired with hands-on expertise in data wrangling, data quality, and forecasting — using SQL, Python, Power BI, and Excel to build dashboards people actually trust. Proven track record leading data projects end-to-end, from raw data to business impact.

Education

- 2022/10 – 2026/07

Bachelor's Degree, Faculty of Computers and Information, Kafrelsheikh University
- 2024/10 – 2025/07

Google Data Analyst Specialist – Data Analytics Track
Digital Egypt Pioneers Initiative (DEPI) In collaboration with the Ministry of Communications and Information Technology (MCIT),
 - Completed an intensive analytics curriculum: prompt engineering, data cleaning and preparation (**SQL & Python**), data-driven decision-making, and visualization (**Power BI & Tableau**).
 - Capstone project: “UK Train Rides — A Data-Driven Journey,” covering EDA, forecasting, dashboard creation, and predictive modeling on real UK rail data.

Professional Experience

- 2025/07 – 2025/09
Giza, Egypt

Data Analyst Trainee
GB Corp
 - Analyzed business and market data to uncover trends and support strategic decision-making.
 - Built dashboards in **Power BI** using **Power Query** and **DAX** to clean, transform, and visualize operations and market-research data.
 - Identified performance gaps and market opportunities that informed leadership decisions.
 - Translated technical findings into clear narratives for non-technical stakeholders.
 - Researched competitor trends and customer behavior to strengthen market positioning.
- 2026/07
Giza, Egypt

RPA Trainee
CB Corp
 - Built **web scraping** automations for **5 live company websites using UiPath**, as part of an active business project.
 - Automated data extraction workflows, cutting manual collection effort and structuring output for downstream analysis.
 - Diagnosed and resolved automation issues on a real business use case, improving workflow reliability and efficiency.
- 2022/06 – 2024/10

Data Entry and Analysis Specialist
Alexandria Contracting Company
 - Structured and maintained technical infrastructure data in **Excel** for engineering and planning teams.
 - Analyzed cable installation data in **Power BI** to optimize material usage and reduce planning errors.
 - Standardized data entry, validation, and documentation workflows, improving coordination between data and field teams.
 - Partnered with stakeholders to keep reporting aligned with active construction projects.

2023	Google Developer Student Clubs (GDSC) - Data Analyst • Collaborated with a team of student analysts on real datasets spanning multiple industries. • Delivered 5+ Power BI and Excel dashboards to support data-driven decision-making. • Owned every project stage — from data collection and cleaning to visualization and presentation.
2024/10 – 2025/07	Digital Egypt Pioneers Initiative (DEPI) - Student <i>Role: Team Leader</i> • Led a national-scale graduation project applying advanced analytics to real-world UK railway data. • Directed the use of SQL and Python to clean, process, and analyze large datasets, ensuring accuracy and consistency in reporting. • Built interactive Power BI dashboards and forecasting models, translating complex data into clear business recommendations.

Skills

Technical Skills

- Data Wrangling
- Data Visualization
- Data Entry
- Market Research & Business Analysis
- Dashboards
- Power Query
- Python
- SQL
- Dax
- Machine Learning
- Probability and Statistics
- RPA (UiPath)

Soft Skills

- **Leadership:** Led the *UK Train Rides* project team, overseeing timelines and successfully delivering an end-to-end data pipeline and forecasting model.
- **Teamwork:** Collaborated with cross-functional teams on data collection, cleaning, and visualization across multiple projects.
- **Problem Solving:** Applied advanced data analysis and predictive modeling techniques to address real-world transport challenges.
- **Critical Thinking:** Designed and developed dashboards and forecasting solutions by detecting key patterns, managing outliers, and ensuring data integrity.
- **Communication:** Presented actionable insights through structured reports and storytelling dashboards tailored to stakeholders.
- **Data Storytelling:** Transformed complex business and financial data into clear, decision-support visuals.

Organizations

2024/02 – 2024/07	Google Developer Student Clubs (GDSC) <i>Member of GDSC, specializing in Data Analysis.</i> • Contributed to data analysis projects, extracting insights with teammates using Power BI and Excel.
	ICPC – ECPC Qualification Round (Egyptian Collegiate Programming Contest) <i>Arab Academy for Science, Technology & Maritime Transport, Alexandria</i> • Represented Kafrelsheikh University in a team-based algorithmic contest focused on problem-solving and logic under time pressure.

Projects

2025/01 – 2025/06	UK Train Rides – A Data-Driven Journey <i>Graduation Project – Digital Egypt Pioneers Initiative (DEPI) - Role: Team leader</i> • Ran exploratory data analysis and validation in Excel, then cleaned and transformed the data with SQL. • Used Python to build machine-learning forecasts of ride volumes and revenue.
-------------------	--

Delivered interactive Power BI and Tableau dashboards with data-driven recommendations for public transport.

Olympic Games Data Analysis:

Developed an interactive Power BI dashboard to analyze Olympic Games data spanning from 1896 to 2016.

- Visualized 120 years of Olympic data (1896–2016): medals by country, top athletes, and season-over-season performance.
- Built dynamic filters by sport, age, and sex, and correlated athlete height/weight with performance.

YouTube Analytics Dashboard:

Designed and developed a comprehensive Power BI report analyzing YouTube metrics.

- Analyzed subscribers, likes, comments, and visits for the top 1,000 YouTubers (2005–2020).
- Mapped subscriber growth by year, content category, and geography to surface engagement trends.
